

NetApp E-Tiering Cloud Appliance

Control. Your. Files.

Assessment - Quick Start Guide

Free File Storage Assessment:

Scan up to 5 Volumes and 25 Terabytes

- Gain In-depth analytics on your file data to better manage your environment
- Receive an NTPS expert led file assessment for up to 25 TB*
- Discover the incredible savings Tiering could bring to your organization by identifying the specific use cases for Tiering based on your actual data

*Full commercial assessments available for larger datasets upon request.

Benefits

- Learn how to reduce the amount of primary disk space usage
- Discover opportunities and risks in your data for effective management
- Receive detailed reports on duplicate files and wasted space
- Identify stale data for archiving/Tier 2 storage
- Gain insight into how you can reduce backups by 25%
- Finally, get an understanding of your data to justify those coming IT purchases!

Up to 80% of file data is old, not being used, duplicated, or not business-related and should be deleted or moved to a more cost-appropriate storage tier, saving you thousands to millions of dollars. But before you can take action, you need to understand your data makeup.

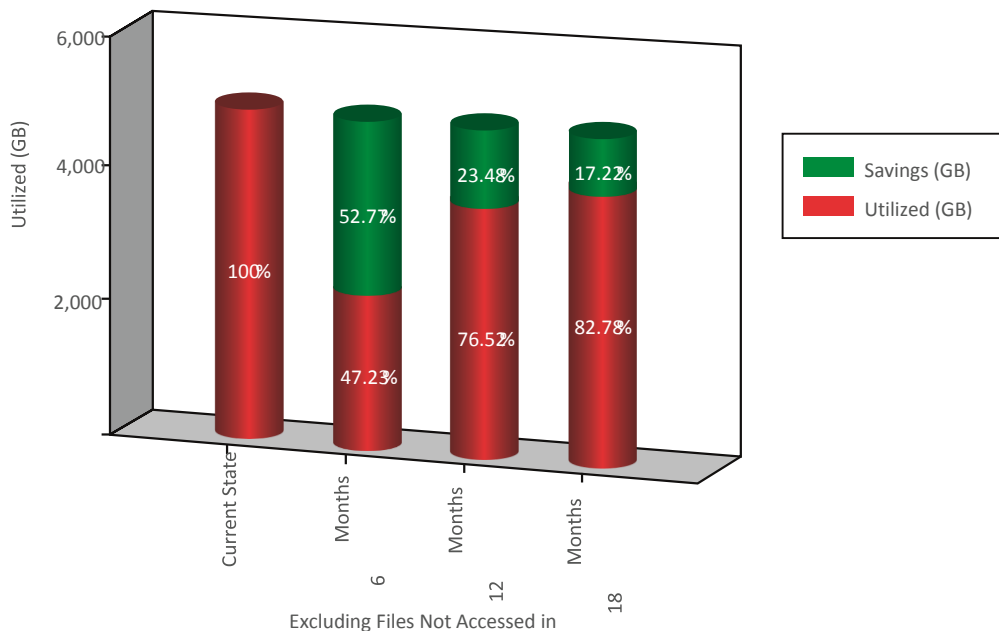

Installation Instructions

1. Download and run the Storage Investigator .exe file, and follow the setup wizard for installation.

<http://www.ntpsoftware.com/eval/downloads/NTP%20Software%20File%20Assessment%20Storage%20Investigator%20Pro%20v2.6b154.exe>

2. Launch Storage Investigator from your Start menu.
3. Select the volumes you want to scan by clicking the volume on the left hand menu, and then click on the “Rescan” button.
4. Once the scan is completed, click on the File menu and choose “Upload Results File.”
5. Enter all of the requested information and then click “Upload” to upload the data files via FTP to NTP Software.
6. Within 24 hours, your representative will deliver assessment reports.

You could free 52.77% by leveraging Tiered Storage
